

Maintenance & Care Guidelines:

***These instructions on maintenance are only suggestions given by the manufacturer. These are not guaranteed methods of care. These instructions do not necessarily cover all issues that may arise under warranty. Warranty does not cover item damaged due to misuse or lack of proper maintenance. For any further information please visit our Sales & Return Policies online at www.minervabeauty.com.

Styling Chairs, Barber Chairs, All Purpose Chairs, Shampoo Chairs, Dryer Chairs & Stools

- The tightness of all screws on chairs and stools may need to be checked from time to time.
- Customers are not to use the footrest as a step as this may cause the footrest to break.
- Before helping your customer up from the styling chair the hydraulic must be fully lowered.

Signature Series Manicure Tables, Styling Stations, Reception Desks and Carts

- If granite is present, this surface should be utilized for holding any chemicals instead of the wood surface. Chemicals such as acetone and dyes have the potential to affect the finish of the furniture.
- Under manufacturer recommendation, any granite surface should be resealed roughly every six months to a year to extend the life and look of the granite.
- An approved electrician must service all equipment still under warranty. Failure to do so will result in the warranty being voided. Documentation must be provided to Minerva Beauty, Inc. for all electrical related warranty issues.
- Slamming drawers shut may cause bends in the drawer glides over time. If shut properly the lifetime of the glides will be extended.

Laminate Manicure Tables, Styling Stations, Reception Desks and Carts

- If glass is present, this surface should be utilized for holding any chemicals instead of the laminate surface. Chemicals such as acetone and dyes have the potential to affect the finish of the furniture.
- An approved electrician must service all equipment still under warranty. Failure to do so will result in the warranty being voided.

Hair Dryers & Hair Steamers

- Usage of any water other than **distilled water** in these products will void the warranty.
- Under manufacturer advice, hair steamers should be cleaned no less than once a week. A mixture of 2 Tbsp **distilled vinegar** should be placed in the water reservoir and diluted with distilled water. An entire cycle of this mixture should be run completely through and then a second cycle of just **distilled water** should be run directly after. The more the steamer is used the more often it should be cleaned.
- Dryer and Steamer hoods should be cleaned and maintained. Build up of any kind of product on the inside of the hood may hinder or break the product.

Backwash Shampoo Systems & Shampoo Bowls

- At no time should any product containing bleach or barbicide be used to clean or sanitize any of the shampoo sinks. Such products may cause the breakdown of seals and result in leaking.
- A licensed plumber must perform all installation for plumbing and all plumbing related equipment. Failure to do so will result in the warranty being voided. Documentation must be provided to Minerva Beauty, Inc. for all plumbing related warranty issues.

Pedicure Chairs

- At no time should any product containing bleach or barbicide be used to clean or sanitize Pedicure Chair basins. Such products may cause the breakdown of seals and result in leaking.
- A licensed plumber must perform all installation for plumbing and all plumbing related equipment. Failure to do so will result in the warranty being voided. Documentation must be provided to Minerva Beauty, Inc. for all plumbing related warranty issues.

Skin Care Equipment

- Usage of any water other than **distilled water** in these products will void the warranty.
- Filters need to be replaced on a consistent basis. Not changing filters may cause clogs in the lines and result in the breakdown of the machine.
- Dry towels should never be placed in a hot towel cabinet as this is a fire hazard and may cause overheating and/or burns to the interior of the unit.
- Under manufacturer advice, facial steamers should be cleaned no less than once a week. A mixture of 2 Tbsp **distilled vinegar** should be placed in the water reservoir and diluted with **distilled water**. An entire cycle of this mixture should be run completely through. Once this cycle has been completed a second cycle of just **distilled water** should be run completely through. The more the steamer is used the more often it should be cleaned.
- UV Sanitizers are for shears and clipper blades. They are not for use on combs, brushes or entire clipper units.
