

Thanks very much for purchasing our Advanced ionic spraying machine. Please read carefully our User's Manual prior to use. After fully mastered it, you will see clearly its excellent performance and operational method.

## Part 1. Functions:

It generates ionized vapor, which can facilitate blood circulation and the metabolic process, rinse the skin and supplement cell moisture. The skin can be improved to a delicate. White and tender new one by frequent use.

## Part 2. How to use:

- (1) Fill the water cup with distilled water, within the limit of warning line.
- (2) Connect to electricity (220V), and push down the power switch. After about 6-8 minutes, water vapor begins to come out from the spray nozzle. Press the ultraviolet switch and ionized nepheloid vapor will be radiating out.

- (3) When the water surface falls below the heating wire, the machine will disconnect power automatically. If continuous use is expected, please first plug off electricity. Empty the remaining water in the cup and clean up the cup before refilling water for subsequent use. Or, it may squirt water instead of vapor.
- (4) The proper position for using vapor is such to blow from the chin up and cover the whole face. Duration of use depends on the user's skin type.

## Part 3. Cautions:

- (1) During installation and vertical tube adjusting, please hold the top of the tube and adjust to the right height slowly.
- (2) Don't put into the cup any chemicals or additives, or it will cause water squirting.
- (3) When using it, please wait until the vapor spray is normal and then begin to point it at human body.
- (4) After each use, empty the remaining water in the cup and clean it up. If there is any calcium oxide on the heating wire, remove it with soft metal brush or by soaking it for a night in vinegar solution.
- (5) Don't use detergent when cleaning the water cup.

#### Part 4. Relevant technical data

Name	Advanced ionic spraying machine
Rated voltage: (V)AC 50Hz	220V-240V
Rated spraying amount: (ml/Hour)	700
Temperature at the steam vent: (°C)	90
Power: (W)	750
Cup volume: (Liter)	1.35
Net Weight:(Kilogram)	9.5

#### Technical data:

Volt:220V-240V or

Volt:120V

Frequency:50-60Hz

Frequency: 60Hz

Power:797W

Power:750W

Attention: This instruction all suit for above electrical appliance description, the products must subject by electric nameplate..  
Electric shock prevention grade: Grade I

#### Part 5. Accessories

One Main Machine

A pair of iron cross Foot Racks, one cross Foot Fork

One Force Bouncing Tube, one Lift / Fall Tube

One Force Bouncing Tube fixing screw, one gasket

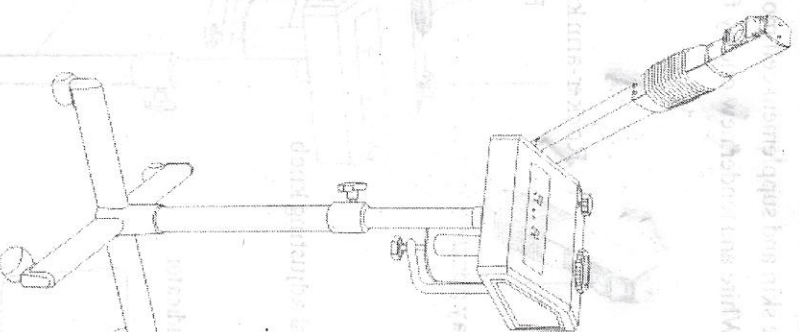

A copy of User's Manual

One certificate

#### WARNING:

1. This machine is not suit for the person who corporeity weakness, recreation slow or impediment pneumonia(include children)use,unless it guide by the person who had safe responsibility and safe use.
2. The children should be supervise that make sure they not play the machine.

## Advanced ionic spraying machine

### User's Manual

### Horse Fitting Method:

Firstly, combine horses 4A and 4B (there are upper and lower gaps available); then insert the cross opening of the cross fork (3); next insert the drawtube into the round hole of the cross fork; then fix them with horse fastening screws (5, 6); at last, insert the lift tube (1) into the round hole of the drawtube and screw down the height regulation knob.
