

## Assembly Instructions: Cambridge Styling Station

**Model #3408**

Parts List		
Label	Item Name	Qty.
A	Main table	1
B	Legs	4
C	Mirror	1
D	Metal Rings	5
E	Screw	12
F	Allen Wrench	1

\*Remove and unwrap all pieces from shipping box. Make sure that the box(es) contain all of the listed parts. A philips head screwdriver and a pencil will be required to assemble this product.  
\*There are two sets of legs. The front legs are labelled as A-1 and A-2 and the back legs are labelled B-1 and B-2.

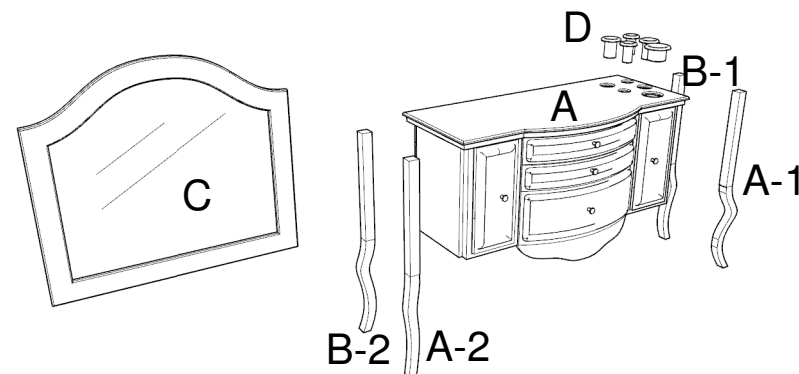

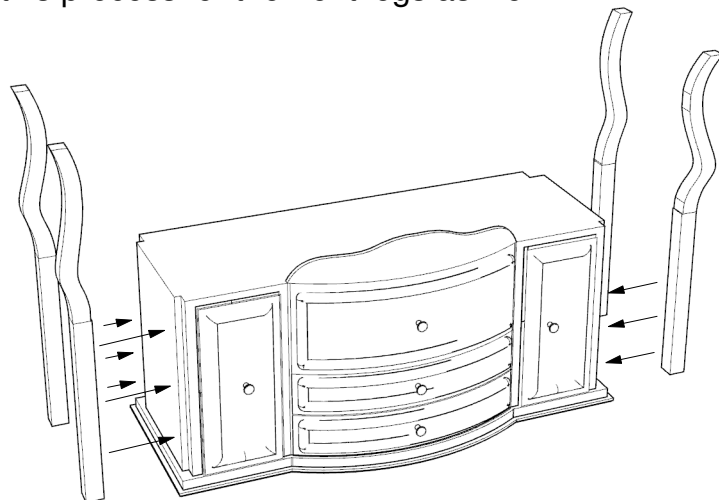

### Pre Assembly Instructions:

- 1: Flip the Main Table (A) over and make sure that the table top is on a padded surface so as to avoid scratches.
- 2: Open the two cabinet doors to get to where the screws will attach the legs to the table.

### Mirror Hanging Instructions:

- 1: Attach mirror to wall using the mirrors anchors.  
Recommended height from top of Station is 2 - 4 in.

After the table has been flipped over and the cabinet doors have been opened, look inside the station body and locate the pre-drilled holes where legs are to be attached. Attach the rear legs to the styling station. When attaching the rear legs, align the pre-drilled holes in the legs with the pre-drilled holes in the station body. Repeat this process for the front legs as well.

Once the legs are firmly attached, replace the drawers and carefully flip the station back over so it is right side up. It would be very beneficial to have another person help, with each person on either side. This would greatly reduce the risk of dropping the station and reduce any strains on the legs.

**Your Cambridge Styling Station has  
been successfully built. Enjoy!**
